Subject: Reddish brown dust photos

Hi Nicole – following up to see if you have any photos that you can share; I know you've been busy, but I'm hoping to get them by the end of this week if possible.

Thanks so much,
Meleah

Subject: Comments on SH Bell's city dust plan

Hi Nicole – here are the comments that we submitted to CDPH on SH Bell's proposed fugitive dust plan earlier this month. You'll recognize the attachments.

Thanks,
Meleah

Subject: Question on siting of filter monitor at S.H. Bell

Hi Nicole – Can you/EPA explain why the filter monitor for metals at S.H. Bell in Chicago is located at the S4 site (the NE monitoring site) and not the S2 site closest to the neighborhood?

Thanks so much,
Meleah

Subject: Re: reference concentration for SH Bell- Chicago

Thanks for the update, Nicole. Does this mean that EPA will not be doing a case-specific analysis of Bell to incorporate "appropriate new toxicological data" per the website describing Table 1 (<https://www.epa.gov/fera/dose-response-assessment-assessing-health-risks-associated-exposure-hazardous-air-pollutants>), either in general or because there hasn't been any such new tox data since 2012?

Best,
Meleah

Subject: reference concentration for SH Bell- Chicago

Hello Meleah:

I just wanted to touch base with you re: the question of the reference concentration EPA will use for SH Bell's Chicago facility, because it was a question of yours in our last meeting.

EPA will be using ATSDR's reference concentration that has been adopted by OAQPS- EPA's website shows it at this link on Page 4 of 8, at the bottom under manganese concentrations.
